

**WS 6.2 – Solving Systems by Substitution (day 2)**

Name: \_\_\_\_\_

1.  $y = 3x - 10$

$y = 2x - 5$

2.  $y = x - 3$

$y = -3x + 25$

3.  $y = x - 7$

$2x + y = 8$

4.  $y = 3x - 6$

$-3x + y = -6$

5.  $3x + y = 10$

$y = -3x + 4$

6.  $4x + 2y = 8$

$y = -2x + 4$

7.  $6x - 3y = 6$

$y = 2x + 5$

8.  $2x + 4y = -6$

$x - 3y = 7$
